

OMAR HELMY

Software Engineer

Phone: +20 1100900011 | Email: omar.helmy.re@gmail.com | LinkedIn: Omar Helmy | GitHub: OHelmyy

Profile

Software engineer seeking an entry-level software development or internship opportunity. Experienced in developing web and mobile applications using modern frameworks, databases, and cloud-based tools through academic and team-based projects.

Education

Misr International University (MIU)

Sep. 2022 - July 2026

Bachelor of Science in Computer Science, Software Engineering Major

Cairo, Egypt

Experience

Talaat Mostafa Group (TMG)

Aug. 2025

IT Intern

Cairo, Egypt

- Supported technical troubleshooting and problem-solving tasks in a professional IT work environment.
- Gained practical experience with system support, daily technical operations, and user assistance.

Projects

Covadev - AI-Based BPMN and Code Validation System | Graduation Project

June. 2026

| *Django, React, TypeScript, AI/NLP, Semantic Similarity*

- Developed a Django and React system that compares BPMN process models with source code using AI summaries, embeddings, and cosine similarity. The system identifies matched tasks, missing functionality, and extra code to support objective developer evaluation and software quality assurance.

Pawtopia - Pet Adoption and Rescue Mobile App | *Flutter, Firebase, Riverpod*

Jan. 2026

- Developed a cross-platform mobile app connecting adopters, shelters, admins, and users.
- Implemented authentication, pet management, adoption requests, favorites, and user profiles.
- Built real-time chat, push notifications, and role-based access control using Firebase.
- Integrated an AI-assisted missing pet matching feature to support rescue workflows.

Smart Factory Management System | *Spring Boot, HTML, CSS, JavaScript, MySQL*

July 2025

- Developed a web-based system for managing production, inventory, and factory workflow data.
- Built backend features with Spring Boot and MySQL with a responsive user interface.

Real Estate Website | *PHP, SQL, HTML, CSS*

Jan. 2024

- Created a dynamic website for browsing and managing property listings.
- Used PHP and SQL to handle database-driven pages and user interactions.

Neo - Clothing Brand Website | *HTML, CSS, JavaScript, Node.js, MongoDB*

July 2024

- Developed an e-commerce web app with product browsing, cart features, and product management.
- Built backend functionality using Node.js and MongoDB with a responsive front end.

Technical Skills

Frontend: HTML, CSS, JavaScript, React.js

Backend: Java, Spring Boot, Django, Node.js, PHP

Mobile Development: Flutter, Dart, Firebase

Databases: MySQL, SQL Server, MongoDB

Programming Languages: Java, JavaScript, PHP, Python, C++, Dart

Tools & Platforms: Git, GitHub, Supabase, Firebase
